DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 21, 24-27, 29-31, 38, 41-43 are rejected under 35 U.S.C. 102(a) as being anticipated by Russ et al (US5,787,933 filed 2/17/95).

The liner is met by the metallic sleeve 3, and the casing is met by the tube 1, for both failing to structurally distinguish from the sleeve 3 and the tube 1 of Russ et al, because liner and casing are of tubular in structure. Russ et al, Fig. 1, also clearly teaches the overlapping of sleeve 3 and tube 1 and the plastic deformation of the inner sleeve resulting in the increase of inner and outer diameters are also clearly shown in Fig.1 and col. 2, lines 32+. The pressure-tight seal between the sleeve and the tube is anticipated by col. 1, lines 26+, where a leackproof between the sleeve and the tube is anticipated. The relatively soft material of inner sleeve is anticipated by col. 1, lines 38+, where a lower strength sleeve is suggested. The recitation "the liner is initially secured relative to the casing by deformaing the liner......", is anticipated by Russ et al, fig. 1, in that the deformations 4 and 4a are conducted in two separate operations, one of them is anticipated to be initially securing the inner sleeve.

The elastic relaxation of the overlapping portion is anticipated by col. 2, lines 61+, where spring-back of the tube 1 and the sleeve 3 is clearly taught and shown in Fig. 2.

Art Unit: 3672

Allowable Subject Matter

Claims 28, 33-37, and 44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frank S Tsay whose telephone number is (703) 308-2170. The examiner can normally be reached on Monday thru Friday, 7:30am-5:00 pm, 2nd Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J Bagnell can be reached on (703)308-2151. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
